

**This year it's 70 years since the first Fejmert Mixer was delivered!**

Over the years, thousands of mixers in various sizes have been manufactured in Sweden and delivered around the world.

The Fejmert Mixer has always been associated with high quality and operational reliability.

The design may not have changed much over the years, but why change something that works well, just for the sake of looks...

Now we continue to serve both new and old customers!
